

**Basic knowledge:** Holidays

**Topic:** Preparing for a birthday

**Curriculum link:** Surrounding world / English language / Construction and technologies

**Educational tasks:**

- Constructs objects related to birthday celebrations

**Tasks:**

1. The teacher distributes to each child a study card for a pastry, muffin or juice, and to one team - for a cake and the corresponding construction material. The teacher explains to the team that will construct the cake that they have to work in pairs, with each pair making a separate tray on the cake, and then assembling it by placing the trays on top of each other.
2. The children construct the models from the respective cards.
3. The teacher places the four large plates next to each other so that they form a tablecloth. He invites the children who made pastries to place them on one plate, muffins on another plate, juices on the third plate, and the cake on the fourth.
4. The children explain what happened at the birthday party table.

**Resources for each child:**

- One of the instruction cards with numbers from 64 to 82 with the respective construction material.

**Resources for the team of six children:**

- Instruction cards with № 83, 84, 85, 86 with the respective construction material.

**Additional resources:** four large green plates.
