- Constructs and describes various objects that are designed for entertainment in an amusement park

**Tasks:**

1. The teacher divides the children into teams that will construct separate objects from the amusement park: Ferris wheel, Gondola, Horse carousel, Slide for two, Wooden carousel, Car carousel, Tunnel maze, Water slide, Water shooting range, Outdoor concert, pavilions and coffee, trees, benches for relaxation, public toilet, parade entrance to the amusement park. Distributes the instruction cards and the relevant constructive material to the teams.
2. During the construction of the objects, the teacher distributes human figures, and the children determine exactly what they want.
3. At the end of the lesson all models are combined into one common one, using 8 large green plates as a basis. Garbage bins are obtained in the necessary places, as well as human figures of visitors who walk in the amusement park. Balloons are placed in the hand of some of the children's figures.
4. Each team presents the created model, describing what is happening in the respective place and why the children visit it.

**Resources for the whole group:**

- Eight large green plates.
- Human figures.
- Balloons.
- Garbage bins.
- Instruction cards with № 277, 278, 279, 280, 281, 282, 283, 284, 285, 258, 158, 286, 154, 146, 151, 147, 143, 138, 136, 139, 132, 134, 406 with the corresponding construction material and accessories.
